

The Ethane Edge: Intelligence that Powers What's Next

Introducing the Global Ethane Outlook – your competitive advantage in a changing market

The OPIS Global Ethane Outlook is the first intelligence service of its kind, delivering end-to-end coverage of the global ethane market—from production and rejection, to transportation, trade flows, pricing, and long-term market dynamics. This subscription service equips you with both short-term tactical insights and long-term strategic forecasts—so you can respond to market shifts with clarity and confidence.

Subscribers receive weekly and monthly market reports, exclusive pricing indices for waterborne ethane trade, in addition to supply, demand, and price forecasts across key global regions. All data is available through our Data Browser and Excel downloads, enabling deep analysis and easy integration into your internal models. By consolidating all ethane-specific intelligence in one place, the Global Ethane Outlook saves you from piecing together fragmented sources.

Why Global Ethane Outlook?

Exclusive Ethane Focus

The only subscription service dedicated entirely to global ethane markets. Get in-depth data and analysis that help you stay ahead—rather than scramble to catch up.

Proprietary Pricing Indices

Access exclusive monthly indices and forecasts for waterborne ethane trade—giving you unmatched visibility into evolving price trends before the rest of the market reacts.

Long-Term Foresight

Make confident strategic decisions with supply, demand, and pricing forecasts through 2050—crafted to support planning, investment, and long-range scenarios.

Flexible Delivery Options

Receive insights the way you need them: weekly and monthly reports, dynamic web tools, and downloadable Excel data for integration and modeling.
